Homemade meals

Team: Hiren Gondhiya & Niraj Amatya

Homemade Meals ?

Platform to order healthy, authentic, home cooked food prepared by people who are passionate about cooking.

Available Choices

- Prepare At home
- Eat at restaurant
- Order takeaway

Problem with current choices

- People are busy with kids and work to always cook at home
- Quality of food unknown in restaurants or takeaway
- Health issues
- Expensive

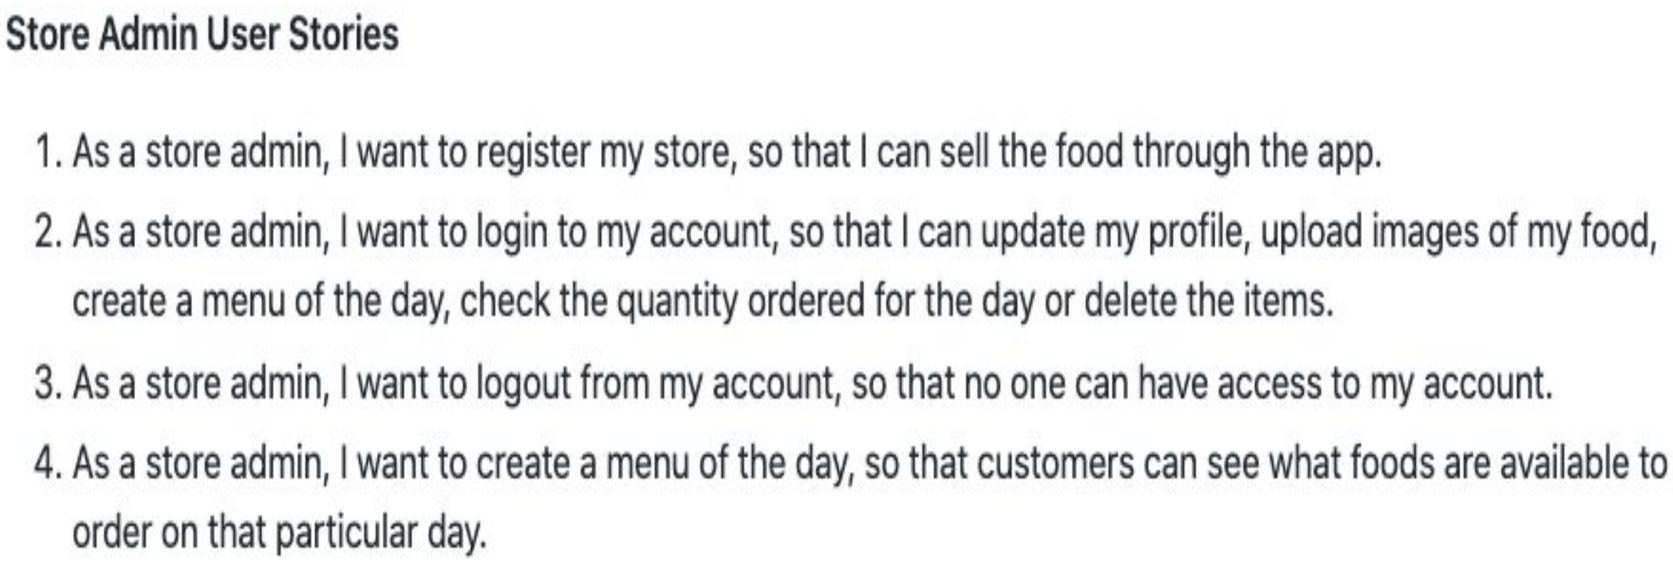
Solution

Ordering home cooked food by local people who are passionate about cooking.

Our Target Customer

- College Students and young adults
- Parents
- Working Professionals

Our user stories



Store Admin User Stories

1. As a store admin, I want to register my store, so that I can sell the food through the app.
2. As a store admin, I want to login to my account, so that I can update my profile, upload images of my food, create a menu of the day, check the quantity ordered for the day or delete the items.
3. As a store admin, I want to logout from my account, so that no one can have access to my account.
4. As a store admin, I want to create a menu of the day, so that customers can see what foods are available to order on that particular day.

Our Challenges

- Managing time with work and kids
- Working online
- Designing
- Confusion with Github workflow
- Merging conflicts

What we learned?

- Team work
- Time management
- Handling disagreements
- Using GitHub as a team
- Working online

Thank you and best of luck…..
